

# Friends of the Tarabai Desai Eye Hospital

The Present  
Hospital

The New  
Annex

*Dear Supporters of the Tarabai Desai Eye Hospital,*

Now that we are reaching the end of the building phase and our dream to extend the facilities for eye care by yet another 'quantum' leap has become reality, we are looking forward to opening the new building in January.

If only the 'However' situation would not be there! We have achieved much, with your help, 'however' we now need to go the extra mile and help to provide sorely needed new medical equipment, beds and furniture to make the new wing an A1 facility where we can operate under state-of-the-art conditions.

On the following page follows a 'Wish List' which really is a list of urgent necessities! Please look it over and find any items you may be able to find funding for or donate.

Please do your best and help.

Please contact me if I can give you any further information or you may have some ideas I and my usual helpers haven't as yet thought of!

Sincerely

Gunter Heyden, Chairman/Trustee  
Friends of the Tarabai Desai Eye Hospital

# Friends of the Tarabai Desai Eye Hospital

Equipment items most urgently needed for the new Eye Hospital extension .

*Dear Supporters,*

## Quite a list of items!

Please see what **YOU** can do to help. It need not be a complete unit, fund items within your capabilities, every contribution is important, large or small. I am sure that we will get there even if it takes a little longer! The need to help the poorer people from sliding into permanent blindness is great and the misery some poorer blind people have to endure is terrible.

Yet most of it is avoidable - **with your help!**

Sincerely

*Gunter Heyden*

## For the New Laboratory:

	Approx Prices in GBP £
Glassware & Pipettes	260
Autoanalyser	1,800
